

Slope Calculator & Line Geometry Report

Two-Point Slope Engine: (1,1) to (4,7) -> Slope = 2.0000, Equation: $y = 2.0000x - 1.0000$

Vertical Line: (3,1) to (3,9) -> Slope = Undefined, Equation: $x = 3.0000$ (Vertical Line)

Perpendicular to $m=0$ at (3,4) -> Equation: $x = 3.0000$ (Vertical Line)
